

Enzymes Plus

- Ease gastric distress
- Improve digestion in the stomach
- Increase absorption of nutrients

How Enzymes Plus Works:

Each capsule is divided into two parts: Gastro-active and Enteric-active. The gastro-active ingredients are the betaine and glutamic hydrochlorides which are released in the stomach, increasing the acidity, which helps the digestive process.

The pancreatic enzymes are enteric coated with a cellulose compound to insure proper release in the small intestine. The enzymes are needed to help complete digestion and to promote complete absorption of nutrients.

Ox Bile promotes digestion of fats. Bromelain is enteric coated to avoid stomach upset and increase absorption for anti-inflammatory effects.

Enzyme Plus Supplement Facts:

Serving Size: 1 Capsule, Servings per Container: 200

1st Phase (releases in the Stomach)

150 mg Proprietary Blend: Betaine Hcl, Glutamic Acid Hcl, Pepsin, Papain, Cellulase

2nd Phase (releases in the Duodenum)

150 mg Pancreatin

Amylase \geq 22,500 Units

Protease \geq 22,500 Units

Lipase \geq 1,800 Units

10 mg Ox Bile Extract (enteric coated)

50 mg Bromelain 2400 GDU/g (enteric coated)
