Renewal Alpha Lipoic

Renewal formulations contain superior antioxidant immune enhancing ingredients to feed cells and tissues, help defeat the signs of aging and keep skin looking its youthful best

An important Reasons to use Renewal Alpha Lipoic:
Together the powerful antioxidants Alpha Lipoic Acid and Vitamin C are more effective than either used alone.

Uses for Renewal Alpha Lipoic:
This combination has been found useful in the stabilization of blood sugar. It has been used in diabetic retinopathy. It reduces cataract formation by preventing oxidative stress in the lens of the eye.

The combination of Alpha lipoic acid and vitamin C is active in both the aqueous and fat soluble portion of cells.   The combination enhances immune function. The ingredients have an anti histamine, anti viral, and antibacterial effect in the body.

Renewal Alpha Lipoic regenerates other antioxidants, such as Vitamin E, Vitamin C and glutathione. It is also a heavy metal chelator. Lipoic acid can utilize a lipid transport mechanism and help prevent a localized intracellular vitamin C deficiency.

Together they play an active role in the production of neurotransmitters.
